Business pulse

What this screen answers

How much business is coming in, how much is moving through the factory right now, and how much is going out. The first thing Jenish sees every morning.

CARDS & DATA USED

Business at a glance

READY Orders (status, quantity, rate), dispatch challans. Rate is optional on orders, so value counts only orders that have a rate.

Orders booked per month

READY Orders by order date, quantity in pcs (meters converted at the order level where needed).

Order value booked

READY Σ quantity × rate per month; last-year line appears once a year of data exists.

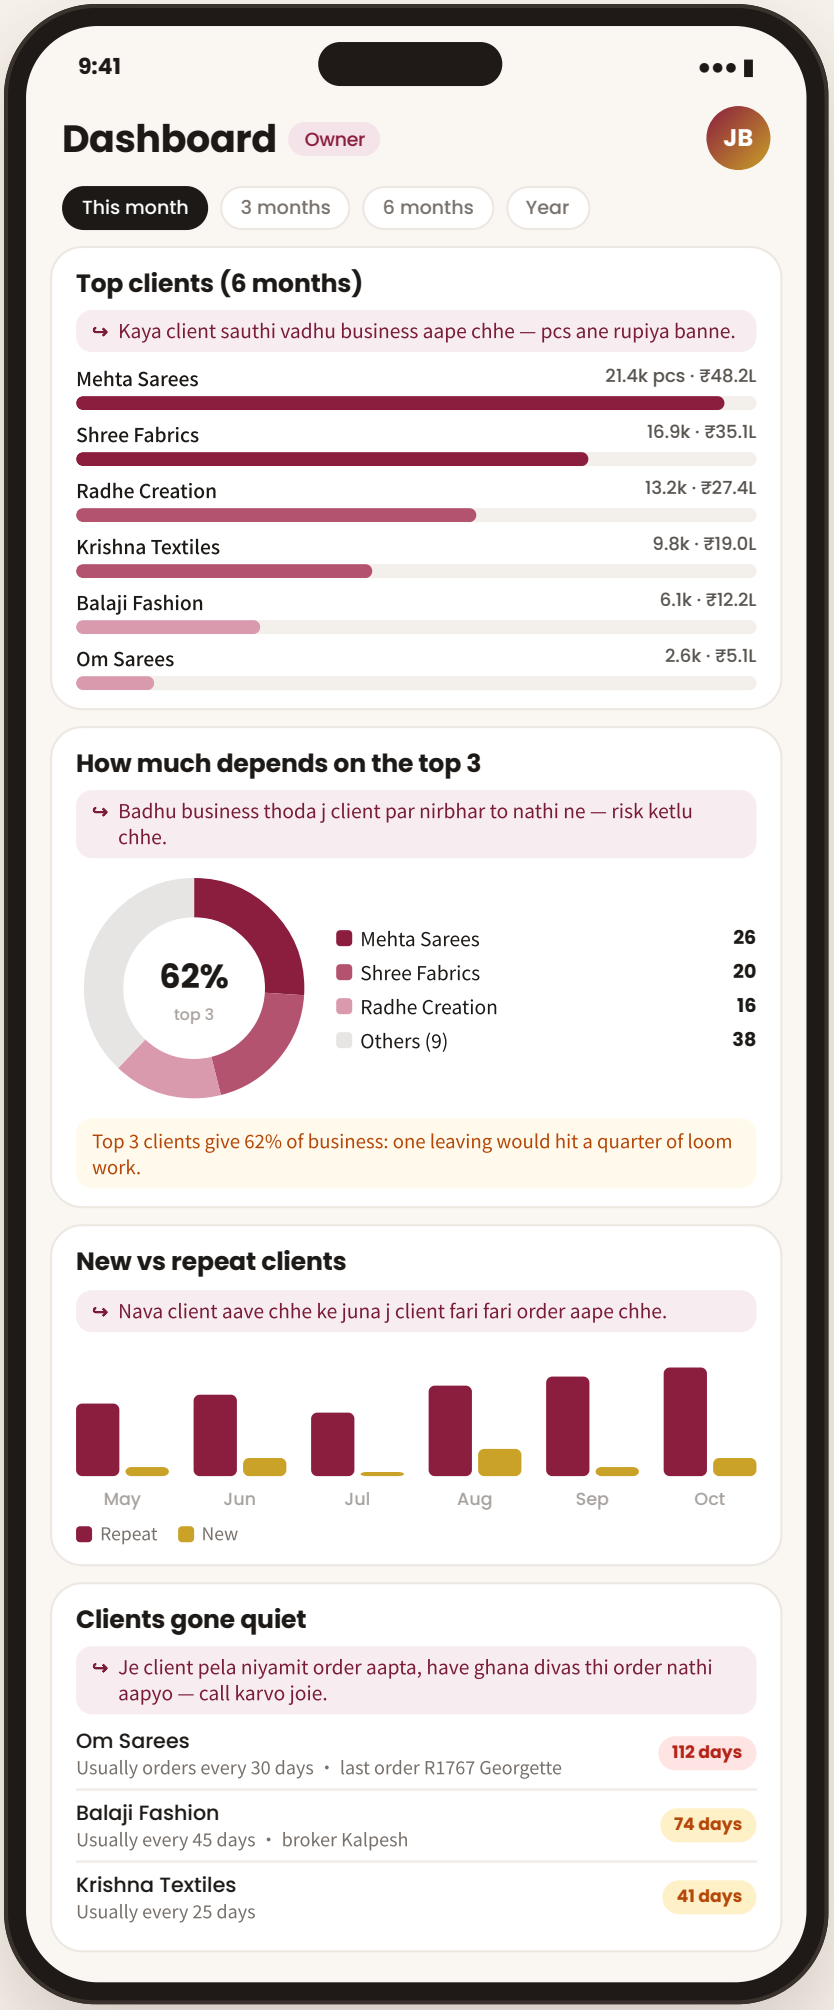

Where the open orders are right now

READY Order status (derived from jobsheets / takas), quantity.

On every card

Tap a number, row or bar to open the list behind it (orders, takas, challans), already filtered. The chips at the top change the period for all cards. Badges: red = act today, amber = watch, green = fine.

Clients

What this screen answers

Who the business really depends on, who is growing, who has gone quiet, and how risky the client mix is.

CARDS & DATA USED

Top clients (6 months)
READY Orders grouped by customer: Σ pcs and Σ pcs × rate.

How much depends on the top 3
READY Share of order value per customer.

New vs repeat clients
READY Customer's first order date vs order month.

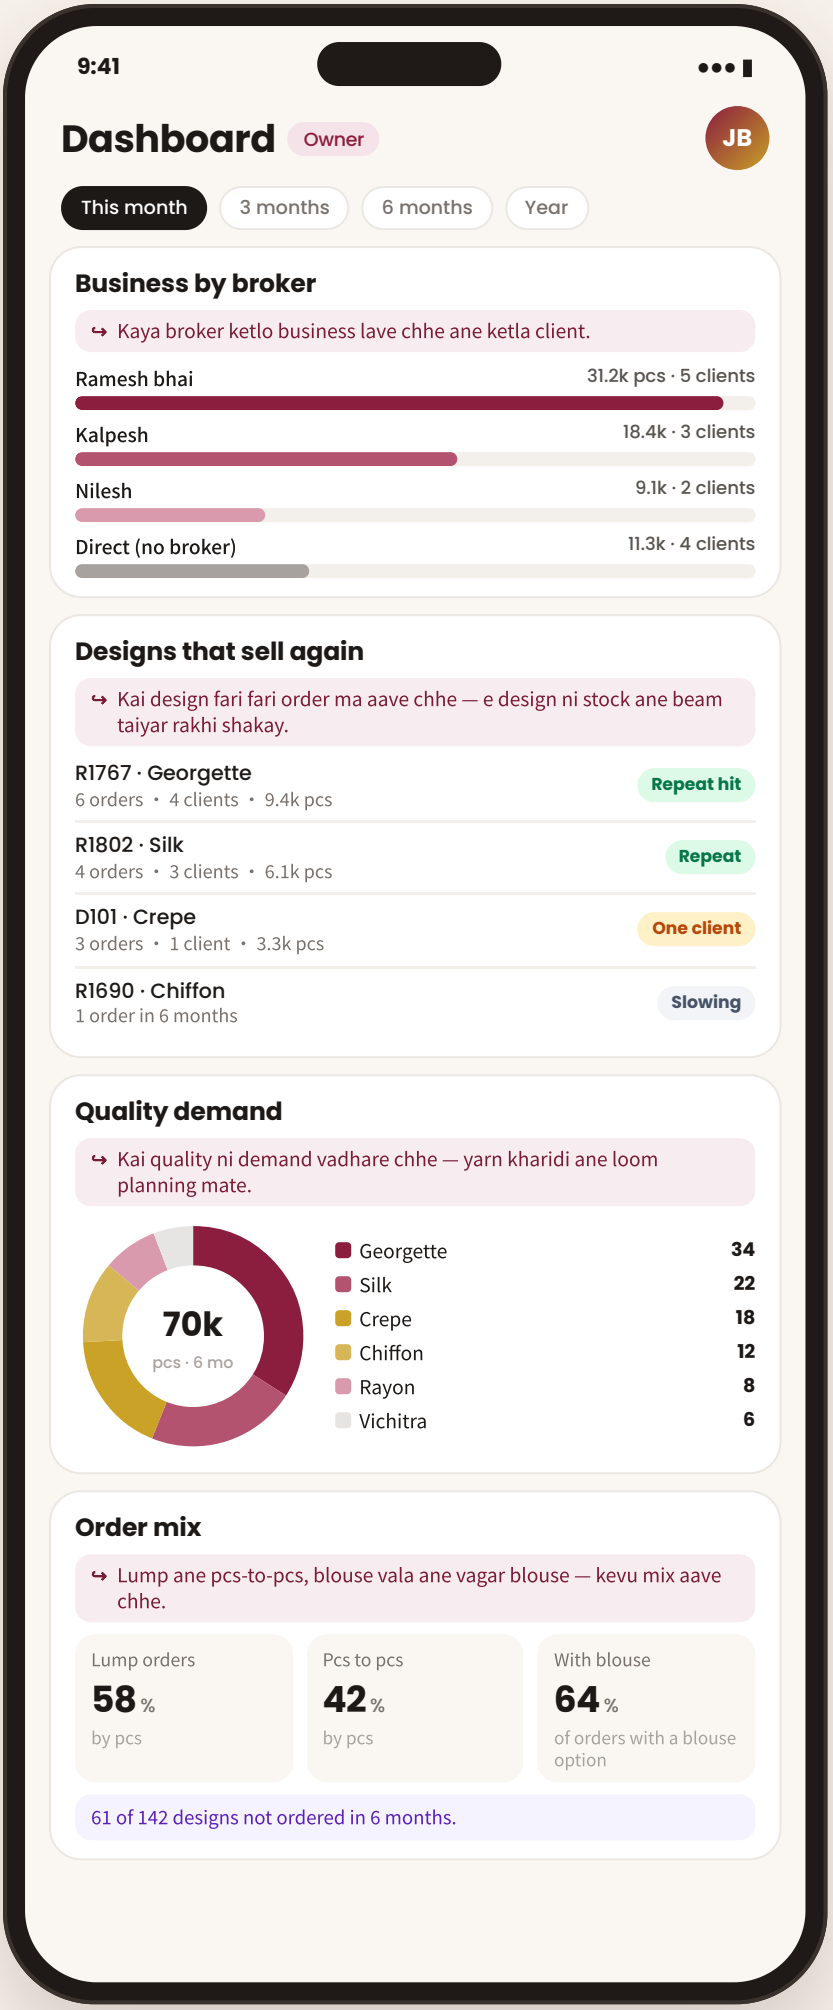

Clients gone quiet
READY Last order date per customer vs their usual gap between orders.

On every card

Tap a number, row or bar to open the list behind it (orders, takas, challans), already filtered. The chips at the top change the period for all cards. Badges: red = act today, amber = watch, green = fine.

OWNER · JENISH

Brokers, designs & qualities

What this screen answers

Which brokers bring business, which designs sell again and again, which qualities are in demand, and how the order mix is changing.

CARDS & DATA USED

Business by broker
READY Orders grouped by broker (customer_brokers).

Designs that sell again
READY Orders grouped by design: order count, distinct clients, pcs.

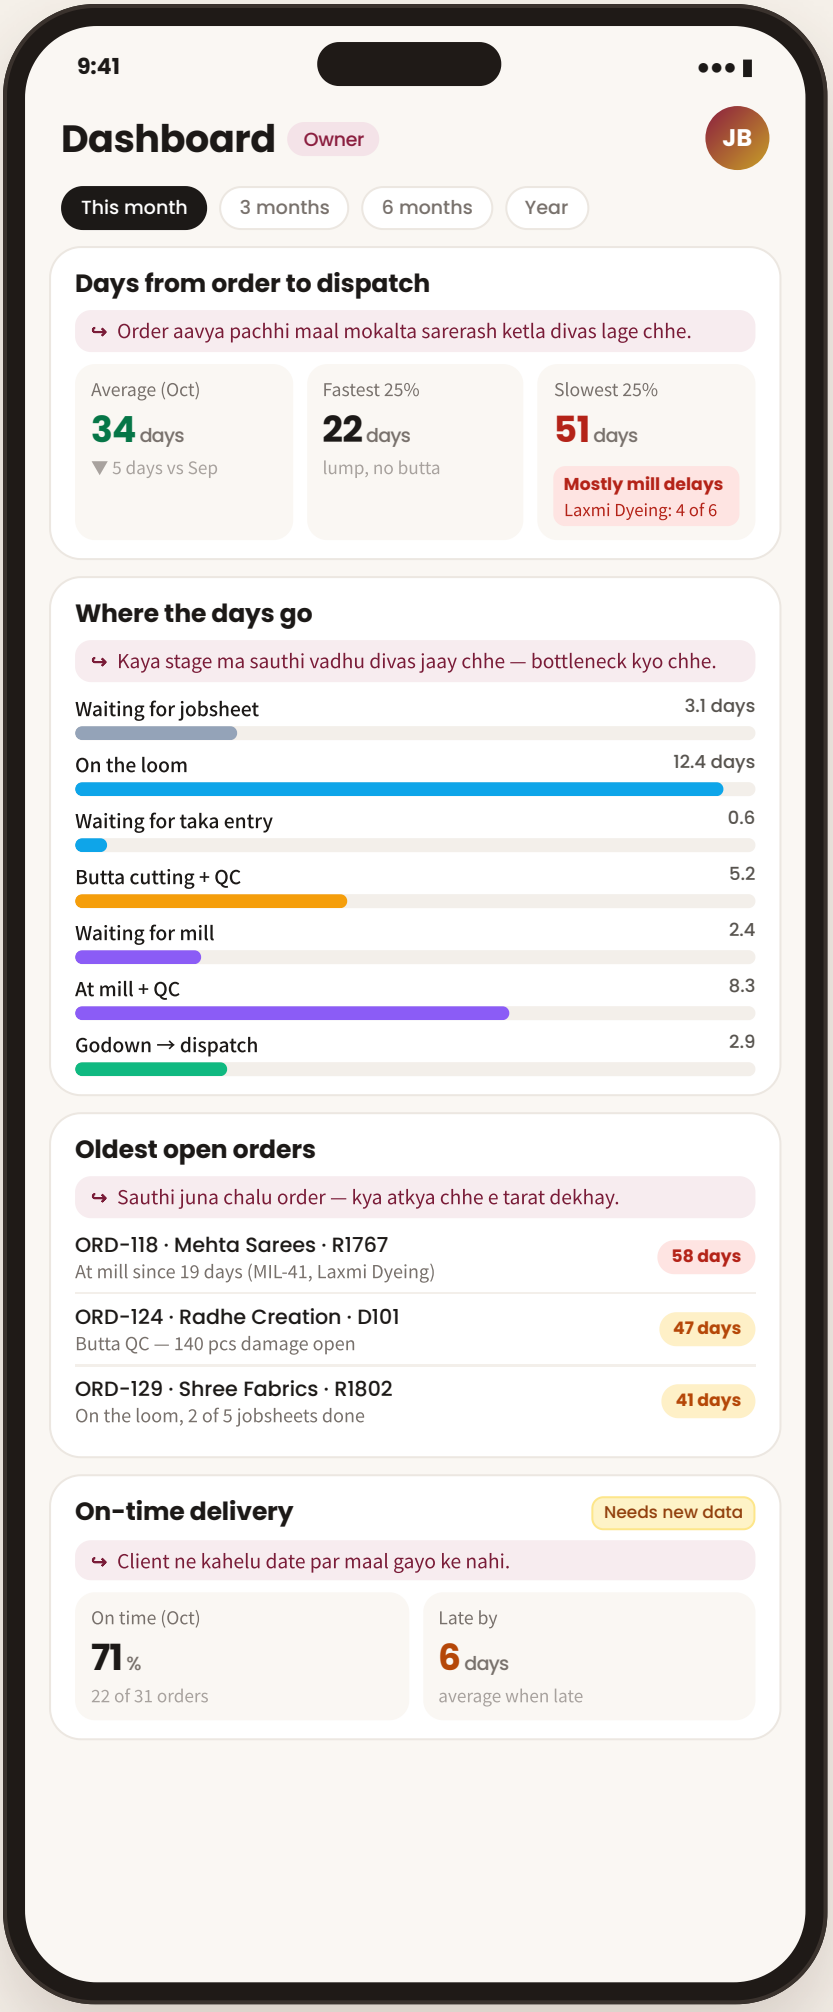

Quality demand
READY Orders grouped by quality (material).

Order mix
READY Order type, blouse option, designs with no order since a date.

On every card

Tap a number, row or bar to open the list behind it (orders, takas, challans), already filtered. The chips at the top change the period for all cards. Badges: red = act today, amber = watch, green = fine.

Speed: order to dispatch

What this screen answers

How long an order takes from booking to dispatch, which stage eats the most days, and which orders are running late.

CARDS & DATA USED

Days from order to dispatch
READY Order date → first / last dispatch challan date.

Where the days go
READY Average time between stage events (order status history, jobsheet events, taka events, challan dates).

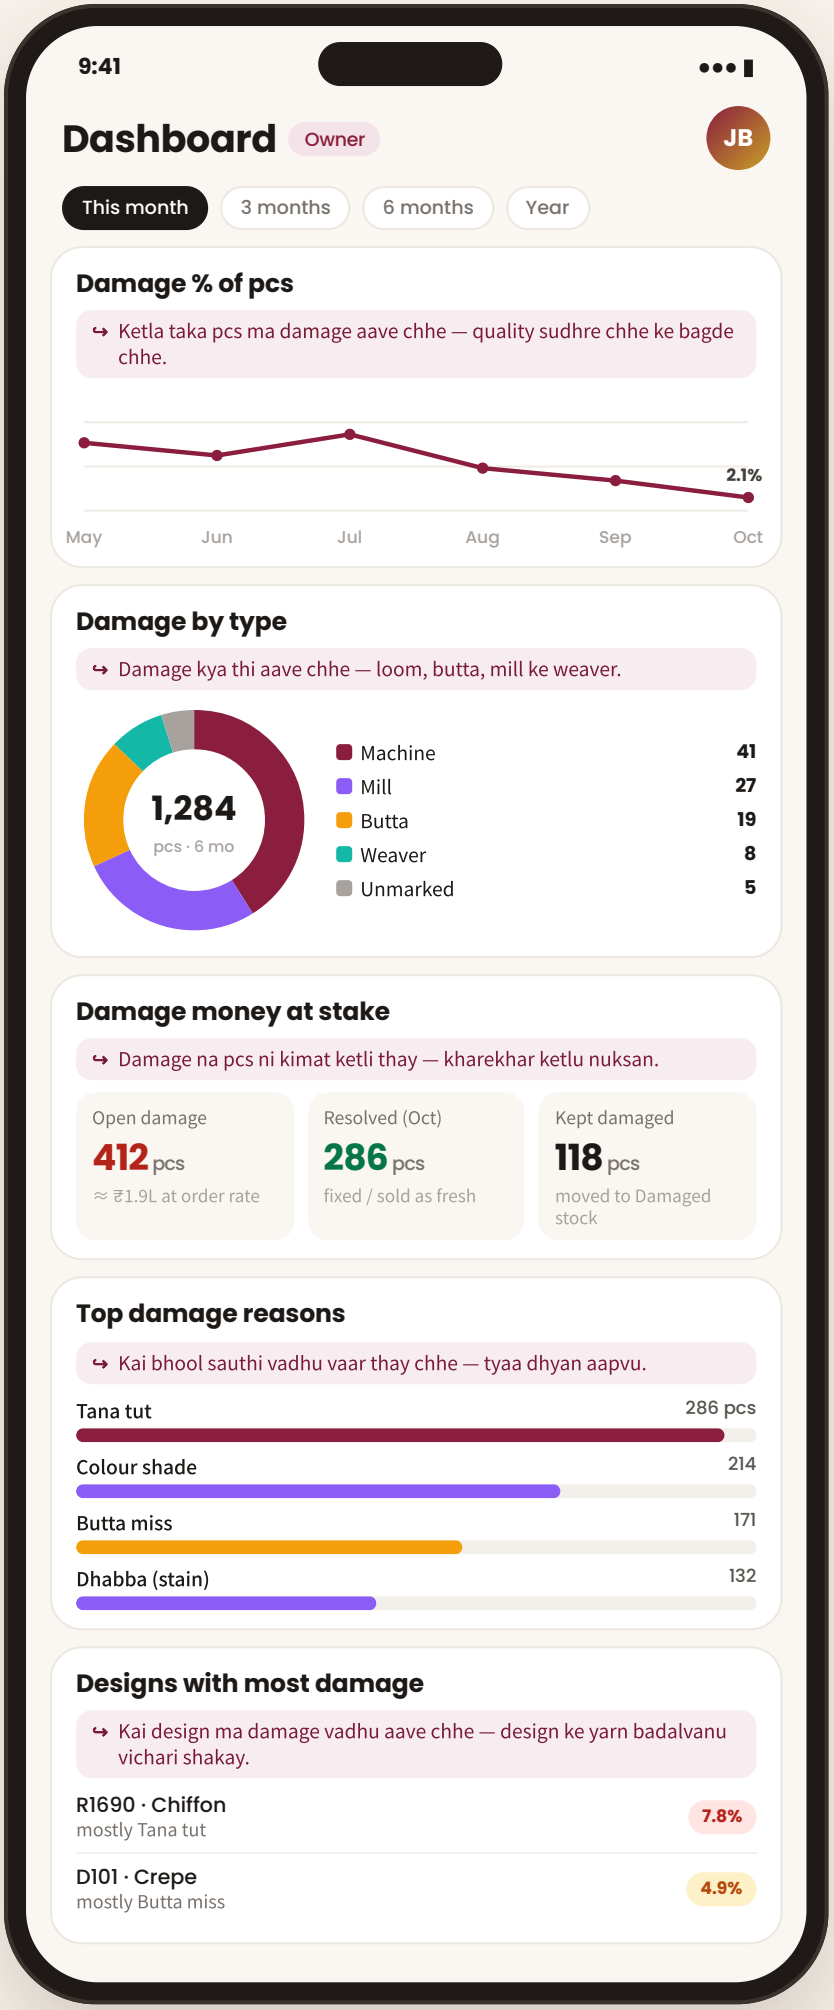

Oldest open orders
READY Open orders sorted by age, with current stage.

On-time delivery
NEEDS NEW DATA Needs a promised delivery date on the order. — add "Promised date" on order

On every card

Tap a number, row or bar to open the list behind it (orders, takas, challans), already filtered. The chips at the top change the period for all cards. Badges: red = act today, amber = watch, green = fine.

Quality & damage

What this screen answers

How much cloth is damaged, where it happens, what it is costing, and which designs or stages cause it.

CARDS & DATA USED

Damage % of pcs

READY Σ damaged pcs (taka_damages) ÷ Σ taka pcs per month.

Damage by type

READY taka_damages.found_at (type).

Damage money at stake

READY Open vs resolved damage pcs × order rate.

Top damage reasons

READY Damage names (damage master) × pcs.

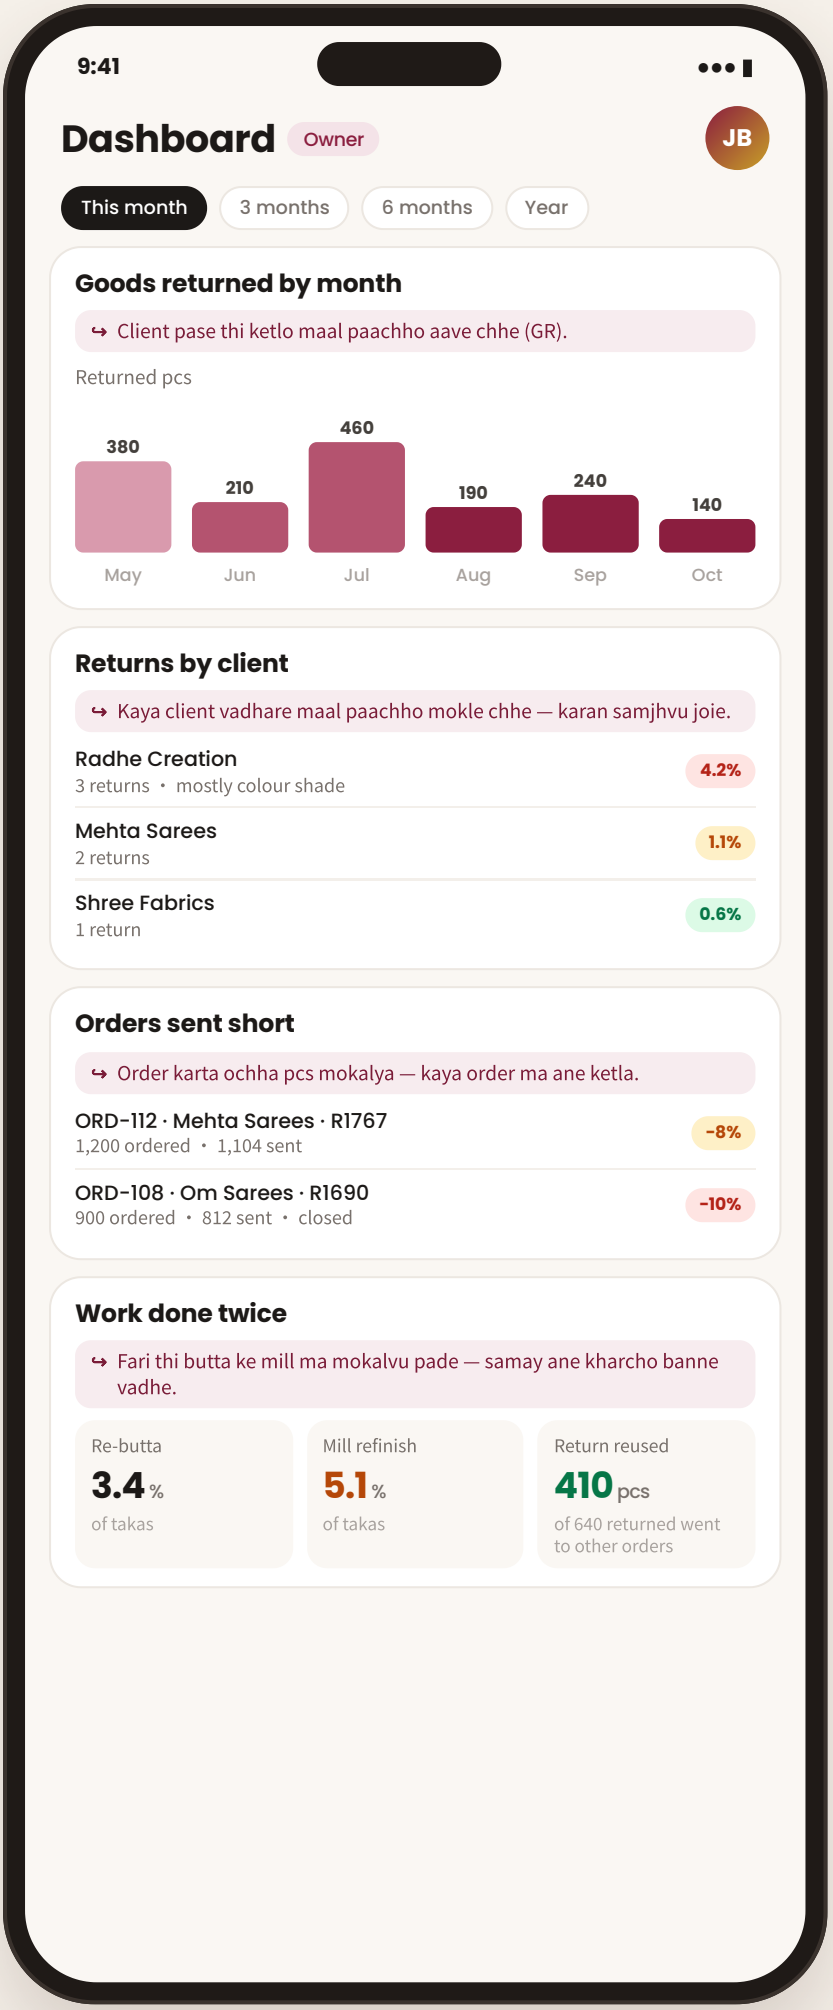

Designs with most damage

READY Damage pcs ÷ taka pcs grouped by design.

On every card

Tap a number, row or bar to open the list behind it (orders, takas, challans), already filtered. The chips at the top change the period for all cards. Badges: red = act today, amber = watch, green = fine.

Returns, short supply & rework

What this screen answers

Goods coming back from clients, orders sent short, and how much work has to be done twice.

CARDS & DATA USED

Goods returned by month
READY Goods returns (lump takas + pcs-to-pcs return lots).

Returns by client
READY Returned pcs ÷ dispatched pcs per customer.

Orders sent short
READY Order quantity vs dispatched pcs (closed or fully dispatched orders).

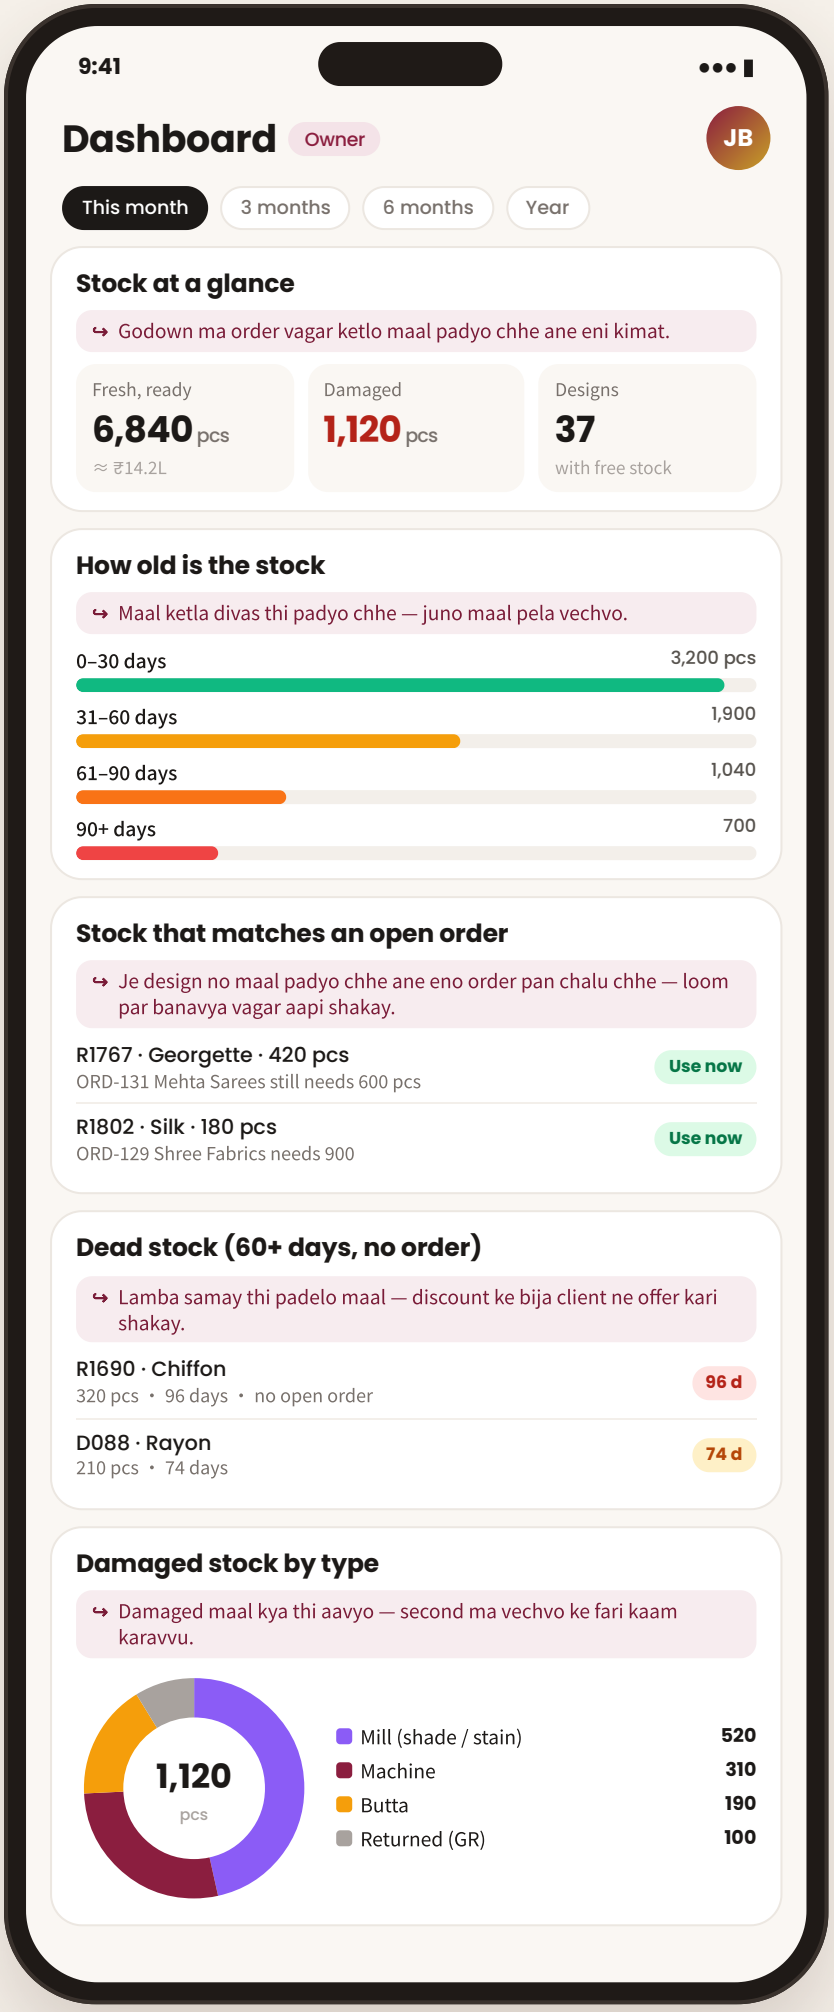

Work done twice
READY Takas that went rework_butta / refinish; returned stock later assigned to an order.

On every card

Tap a number, row or bar to open the list behind it (orders, takas, challans), already filtered. The chips at the top change the period for all cards. Badges: red = act today, amber = watch, green = fine.

OWNER · JENISH

Stock (free stock & inventory)

What this screen answers

What is lying in the godown without an order, how old it is, and what can be sold right now.

CARDS & DATA USED

Stock at a glance

READY Free stock (takas not in an order) + inventory, by fresh / damaged. Value uses the design's last order rate.

How old is the stock

READY Date the taka became free stock (move to inventory / GR / leftover).

Stock that matches an open order

READY Free stock design = open order design with pcs still not covered.

Dead stock (60+ days, no order)

READY Free stock older than 60 days with no open order of that design.

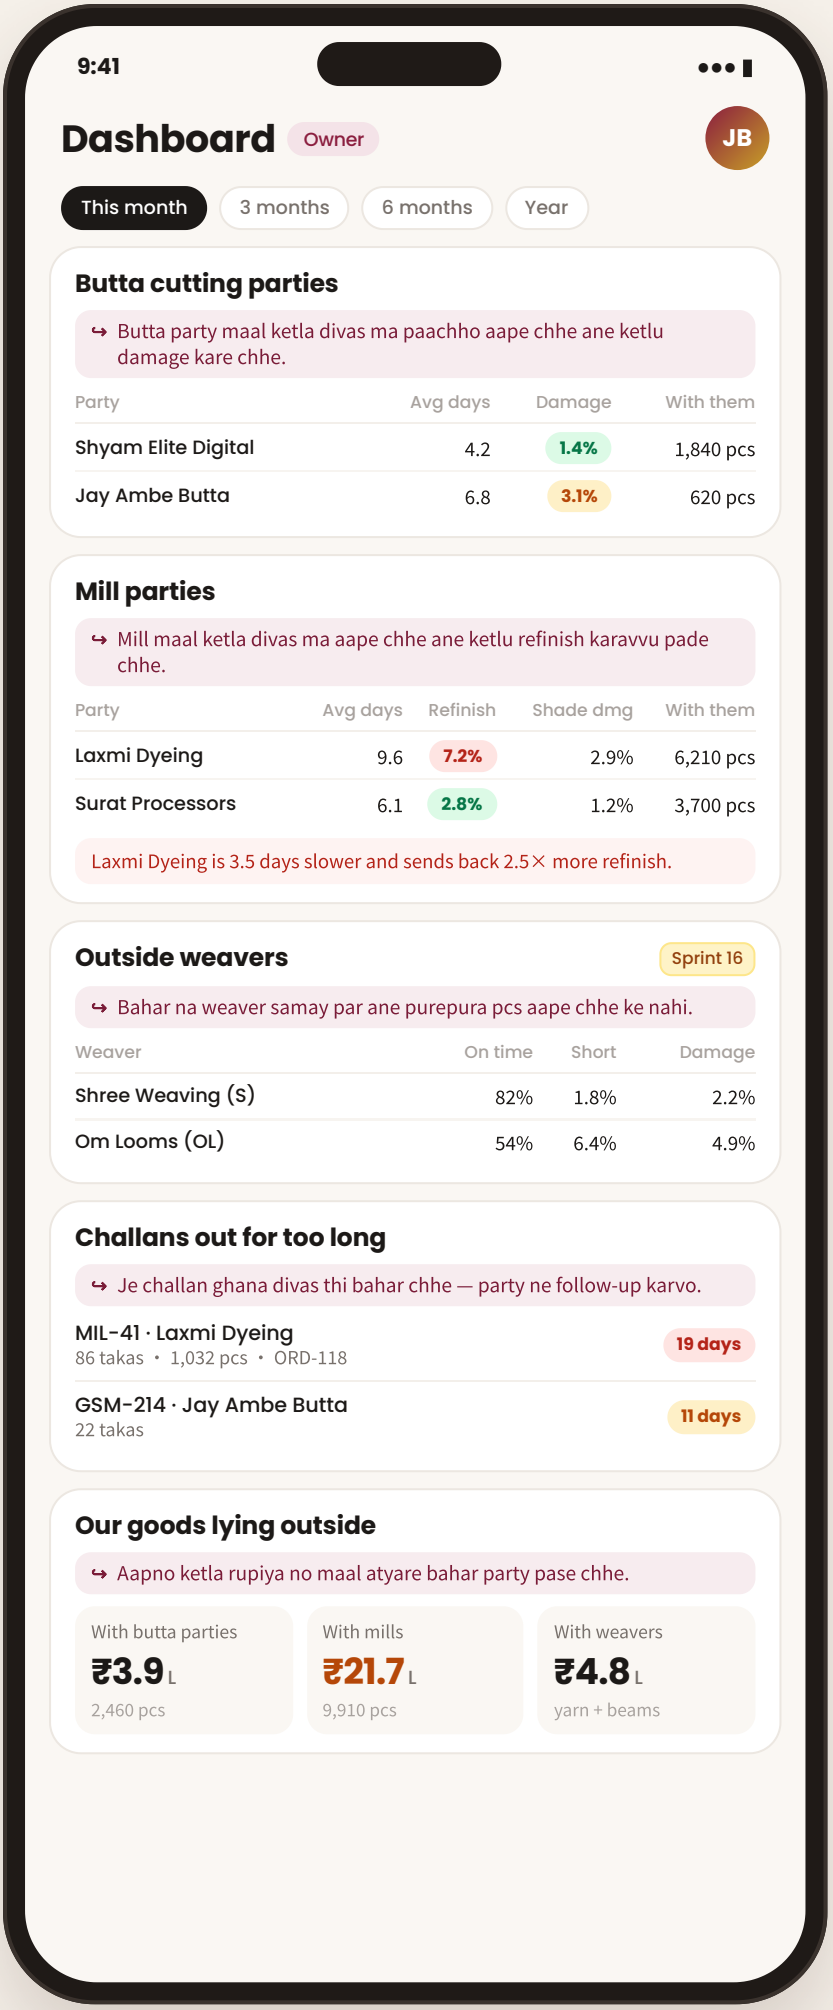

Damaged stock by type

READY Inventory → Damaged, by damage type.

On every card

Tap a number, row or bar to open the list behind it (orders, takas, challans), already filtered. The chips at the top change the period for all cards. Badges: red = act today, amber = watch, green = fine.

Vendors: butta, mill, weavers

What this screen answers

Which job-work parties are fast and careful, which are slow or damage cloth, and what is lying with them right now.

CARDS & DATA USED

Butta cutting parties
READY Butta challans: send date → receive date; butta-type damage ÷ pcs.

Mill parties
READY Mill challans, refinish takas, mill-type damage.

Outside weavers
SPRINT 16 Outside production POs and receipts.

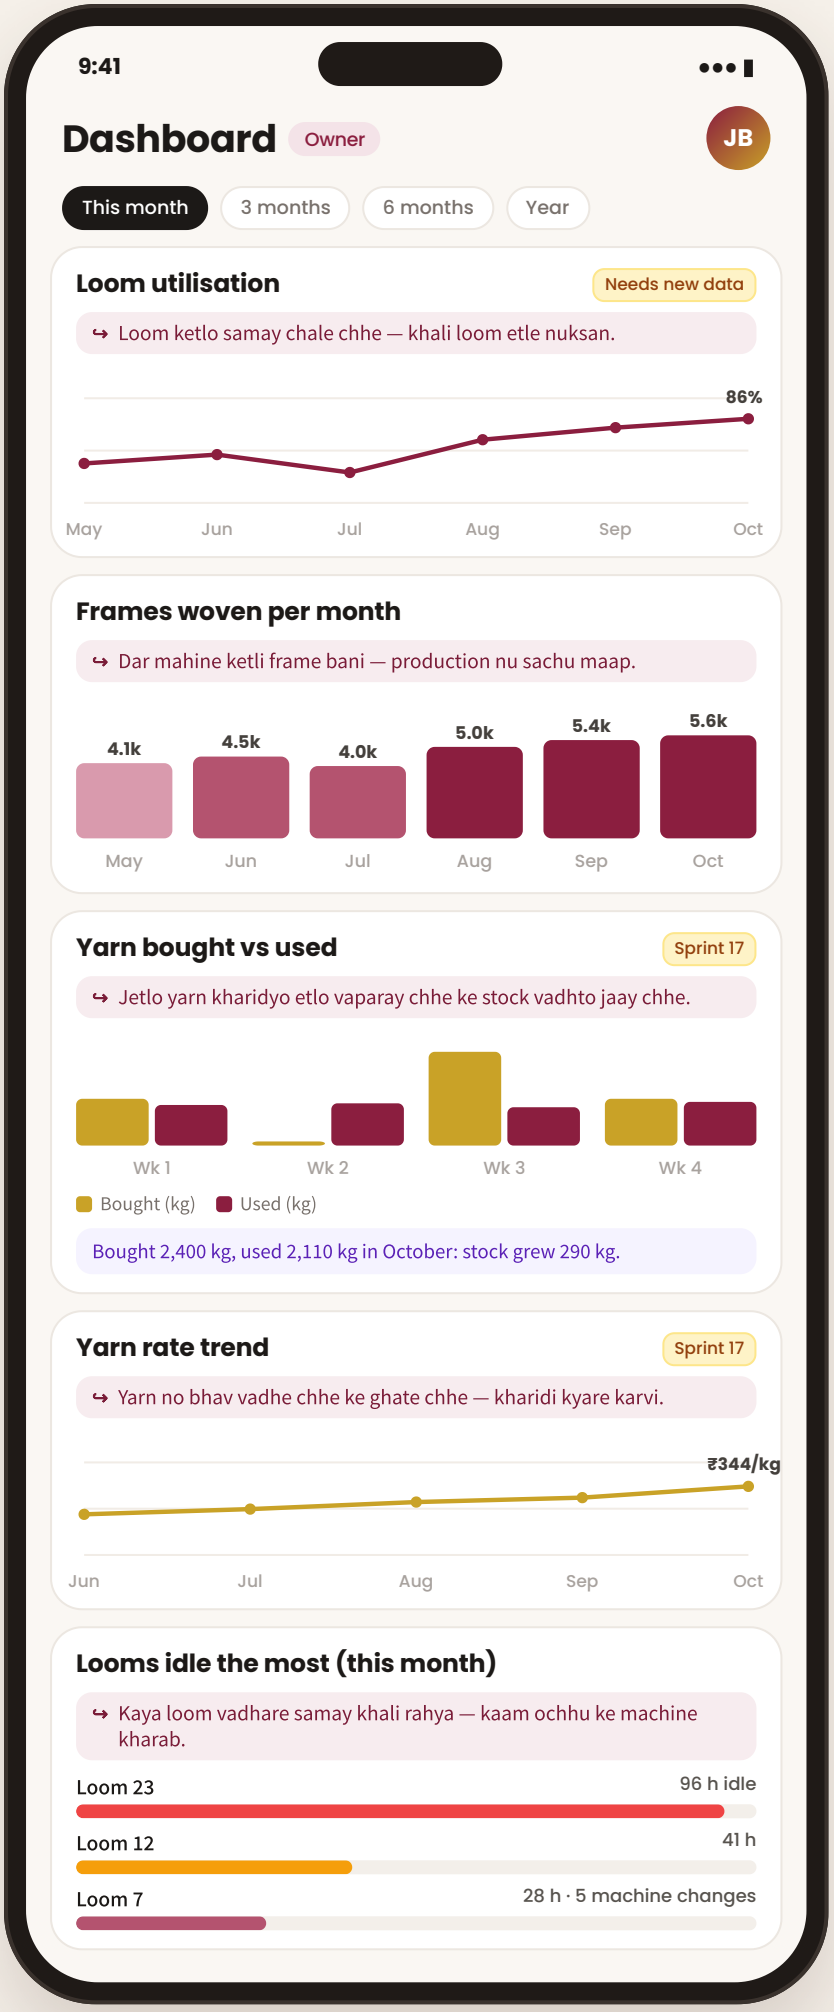

Challans out for too long
READY Active challans with takas not yet received, by age.

Our goods lying outside
READY Pcs on active challans × order rate; weaver part needs Sprint 16 / 17.

On every card

Tap a number, row or bar to open the list behind it (orders, takas, challans), already filtered. The chips at the top change the period for all cards. Badges: red = act today, amber = watch, green = fine.

Looms & yarn

What this screen answers

Whether the looms are being used fully, and whether yarn buying matches what the factory actually uses.

CARDS & DATA USED

Loom utilisation
NEEDS NEW DATA Σ jobsheet running hours (started → completed) ÷ available loom hours. — working hours per day (one setting)

Frames woven per month
READY Frames from completed jobsheets (frames done).

Yarn bought vs used
SPRINT 17 Yarn PO receipts vs withdrawals / beam consumption (yarn_stock_moves).

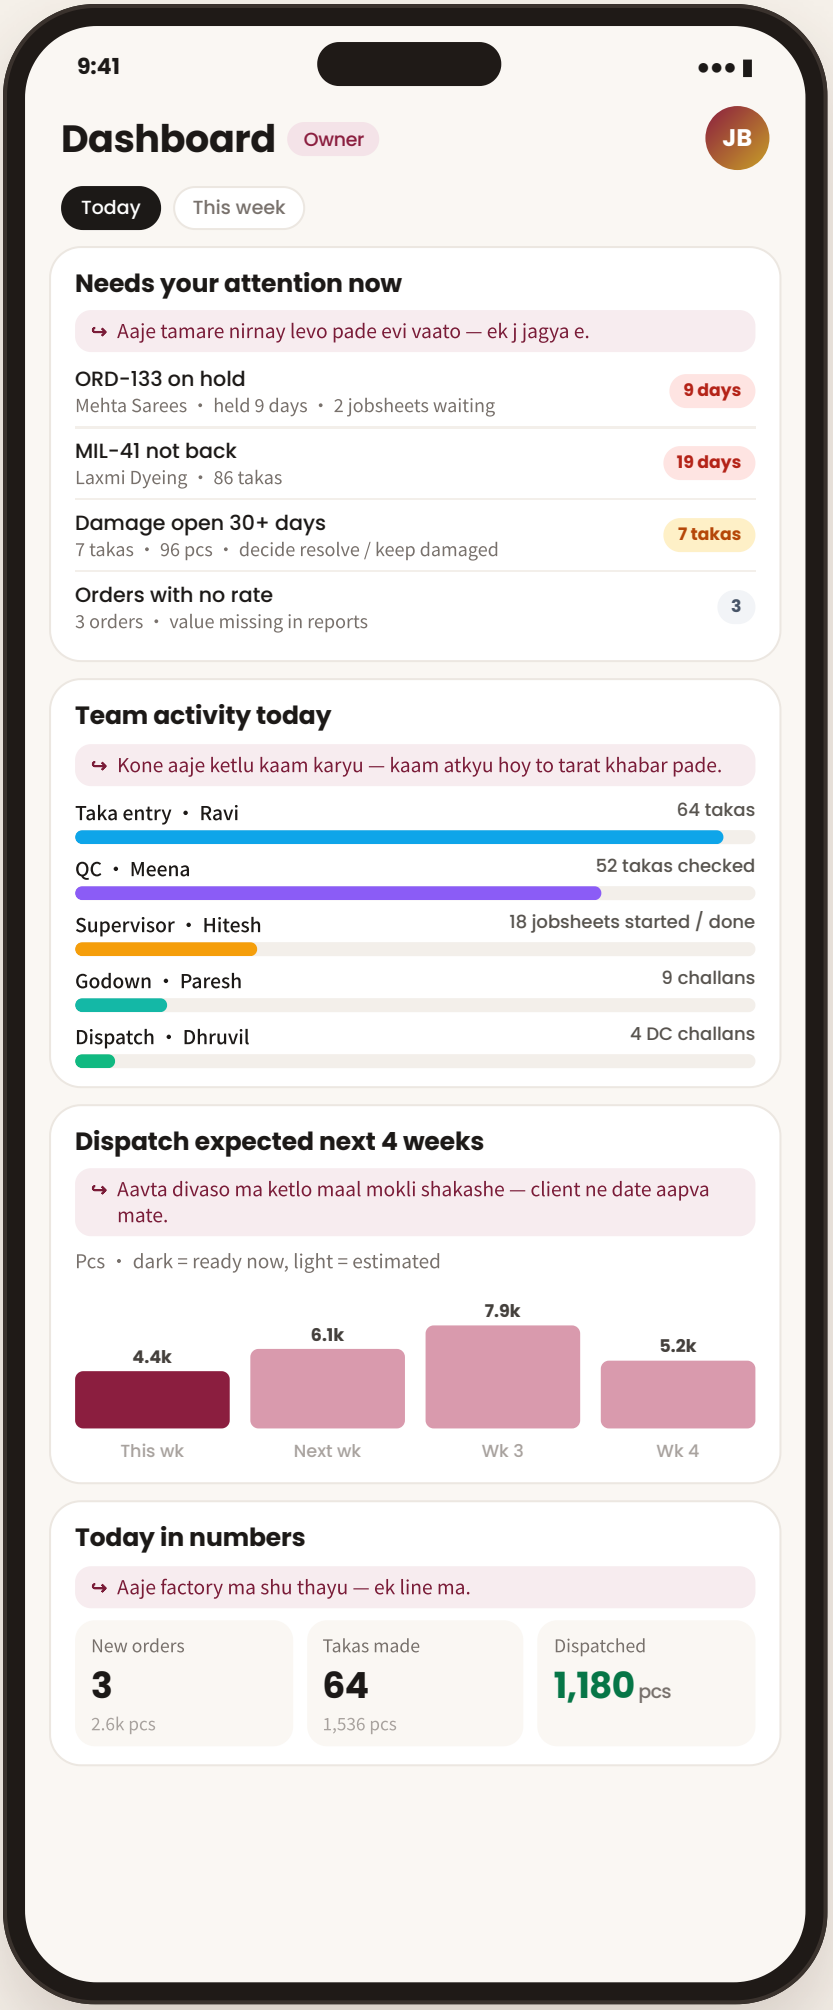

Yarn rate trend
SPRINT 17 Yarn PO line rate by quality and date.

Looms idle the most (this month)
READY Gaps between jobsheets on the same loom.

On every card

Tap a number, row or bar to open the list behind it (orders, takas, challans), already filtered. The chips at the top change the period for all cards. Badges: red = act today, amber = watch, green = fine.

Needs your attention & team

What this screen answers

One list of everything that needs Jenish's decision today, what the team did, and what will be dispatched soon.

CARDS & DATA USED

Needs your attention now
READY Hold events, challan age, open damage age, orders without rate.

Team activity today
READY Events (taka, jobsheet, challan) by user, today.

Dispatch expected next 4 weeks
READY Ready + Mill QC now; at mill / butta by average stage time (estimate).

Today in numbers
READY Orders created, takas created, dispatch challans today.

On every card

Tap a number, row or bar to open the list behind it (orders, takas, challans), already filtered. The chips at the top change the period for all cards. Badges: red = act today, amber = watch, green = fine.
