02 Loom floor

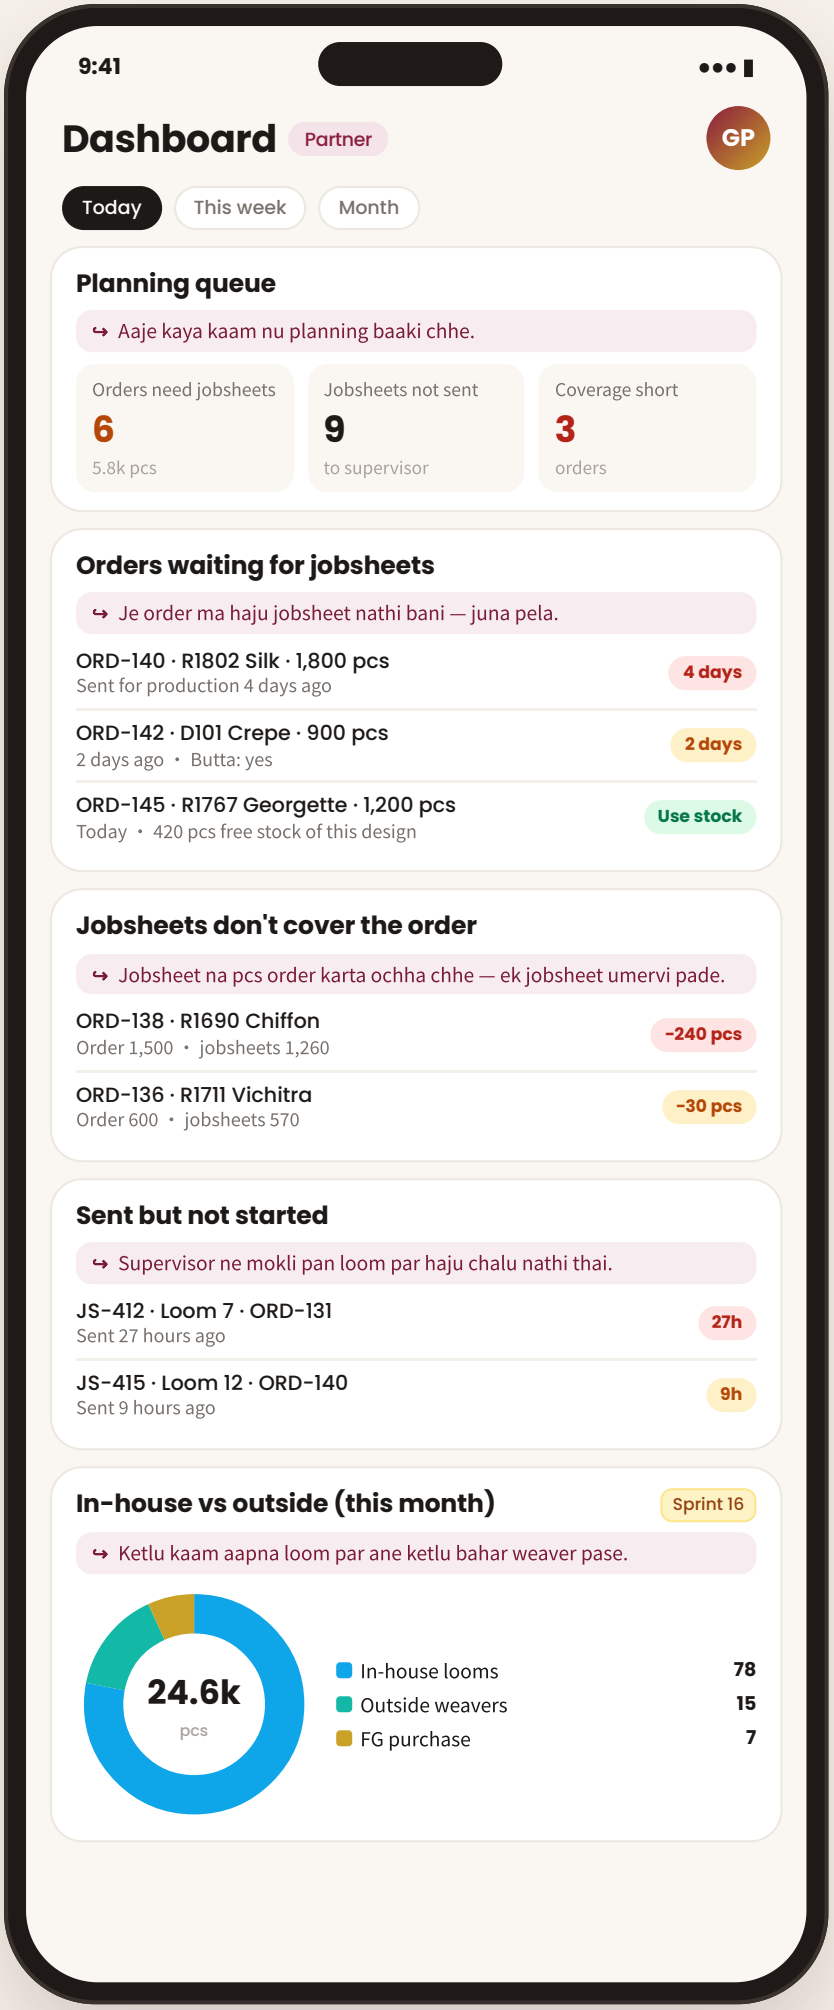

03 Loom reliability

04 Flow after the loom

05 Outside production & FG

06 Yarn, TFO & beams

Production planning

What this screen answers

What has to be planned next: orders without jobsheets, jobsheets not covering the order, and jobsheets not yet sent or started.

CARDS & DATA USED

Planning queue

READY Order status pending_production / ready_production; jobsheet status Pending; coverage = jobsheet pcs vs order pcs.

Orders waiting for jobsheets

READY Orders sent to production without jobsheets, by age; free stock of the same design.

Jobsheets don't cover the order

READY Order pcs − Σ jobsheet pcs (live, Sprint 15 maths).

Sent but not started

READY Jobsheets status sent, by time since sent_at (the 24 h rule).

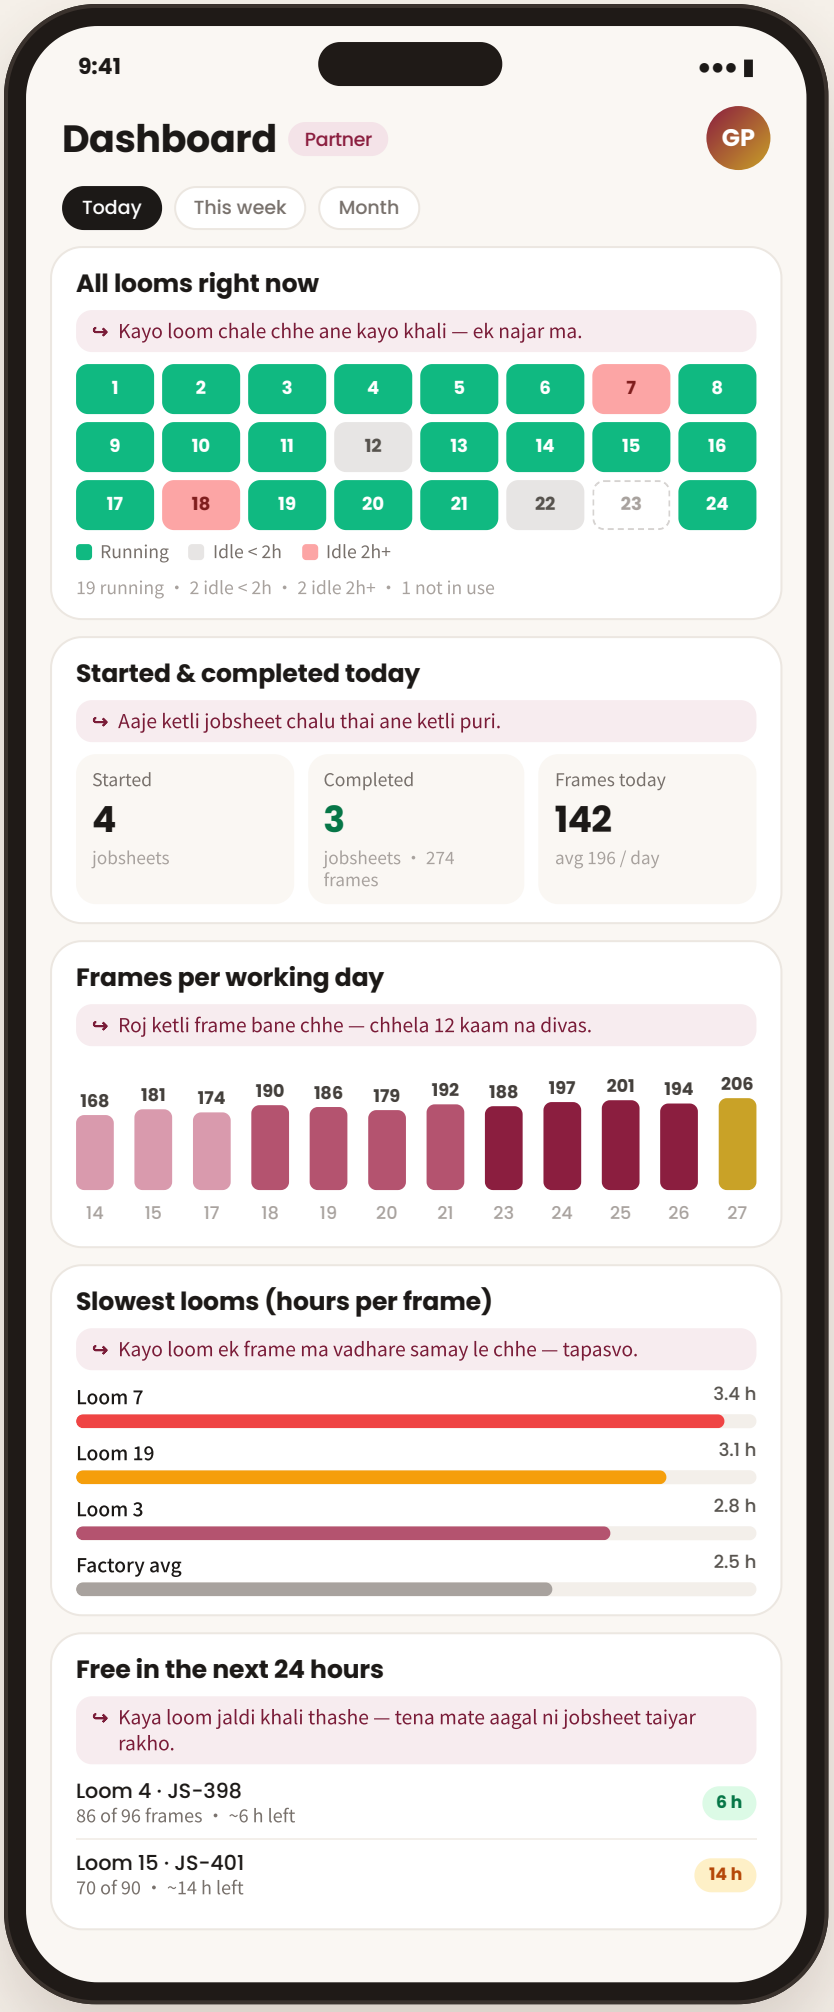

In-house vs outside (this month)

SPRINT 16 Order steps / outside POs / FG receipts.

On every card

Tap a number, row or bar to open the list behind it (orders, takas, challans), already filtered. The chips at the top change the period for all cards. Badges: red = act today, amber = watch, green = fine.

Loom floor

What this screen answers

The live state of all 24 looms, today's output, and which looms will be free soon so the next jobsheet can be planned.

CARDS & DATA USED

All looms right now

READY Machines + jobsheet status ongoing (jobsheet_machines).

Started & completed today

READY Jobsheet start / complete events today; frames entered.

Frames per working day

READY Frames done from jobsheets per completion date (holidays skipped).

Slowest looms (hours per frame)

READY Jobsheet running hours ÷ frames, per machine (30 days).

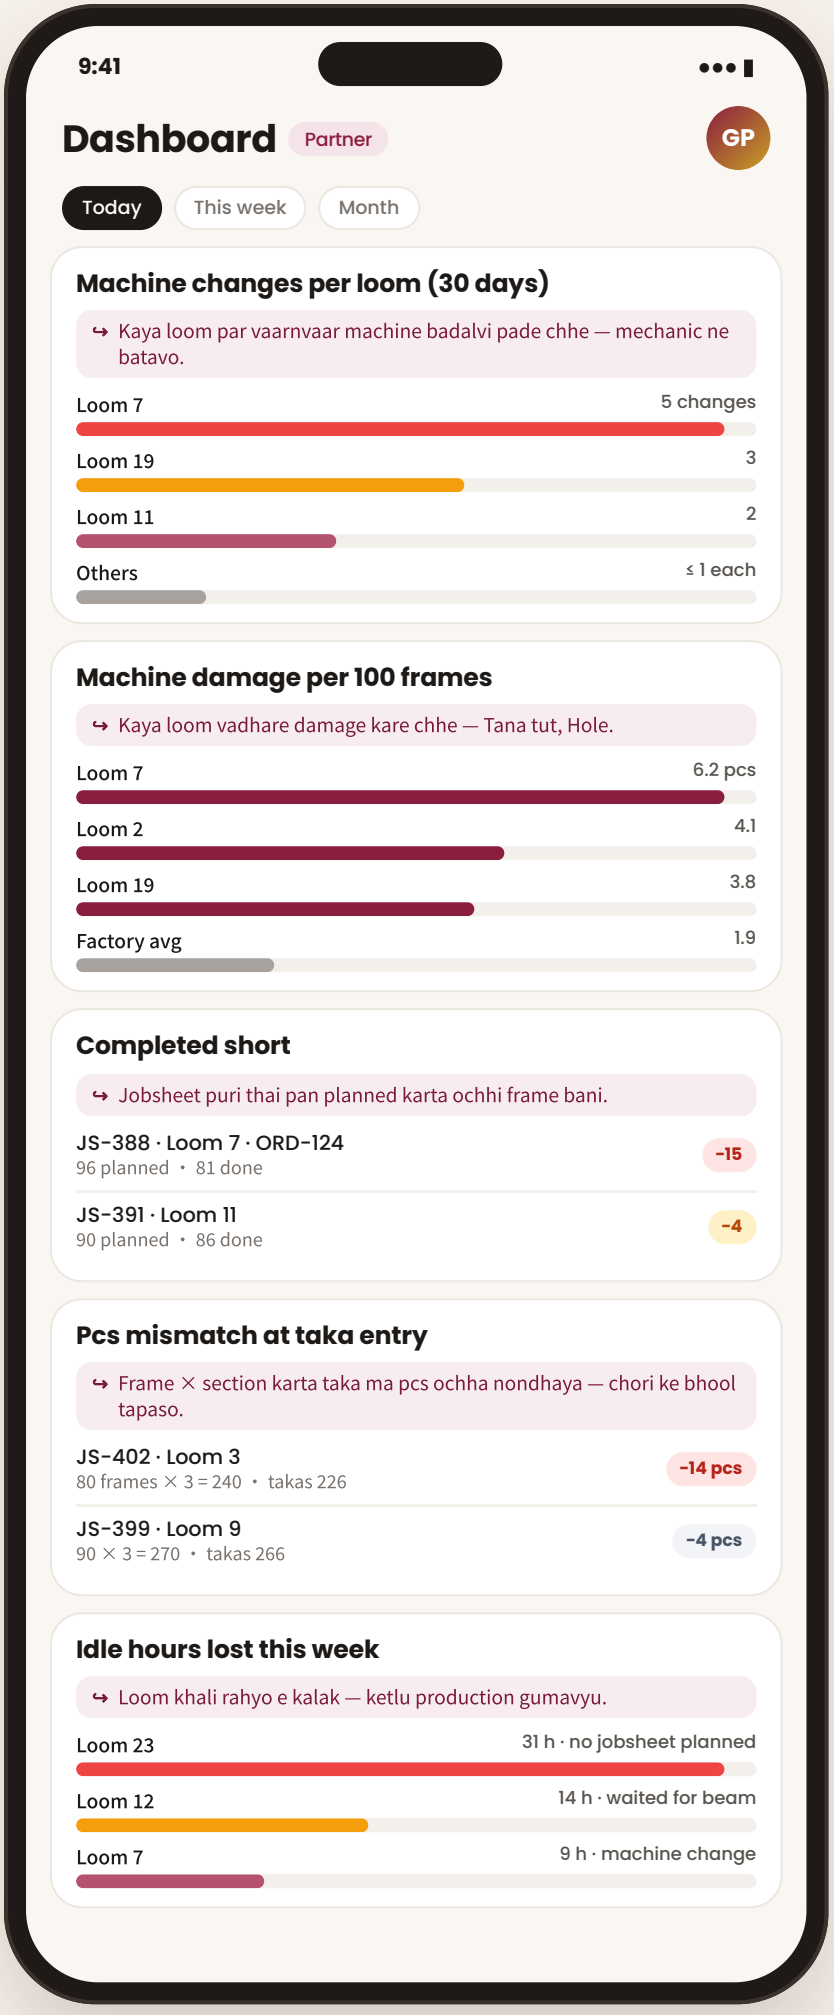

Free in the next 24 hours

READY Ongoing jobsheets: planned frames vs started time × avg speed (estimate).

On every card

Tap a number, row or bar to open the list behind it (orders, takas, challans), already filtered. The chips at the top change the period for all cards. Badges: red = act today, amber = watch, green = fine.

Loom reliability

What this screen answers

Which looms break down, finish short or cause damage, so maintenance can be planned before it costs orders.

CARDS & DATA USED

Machine changes per loom (30 days)
READY Change-machine events (jobsheet_machines / jobsheet_events).

Machine damage per 100 frames
READY Machine-type damage pcs from takas of the loom's jobsheets ÷ frames.

Completed short
READY Jobsheets completed with frames done < planned.

Pcs mismatch at taka entry
READY Frames × sections vs Σ taka pcs per jobsheet (the existing taka entry warning, kept as history).

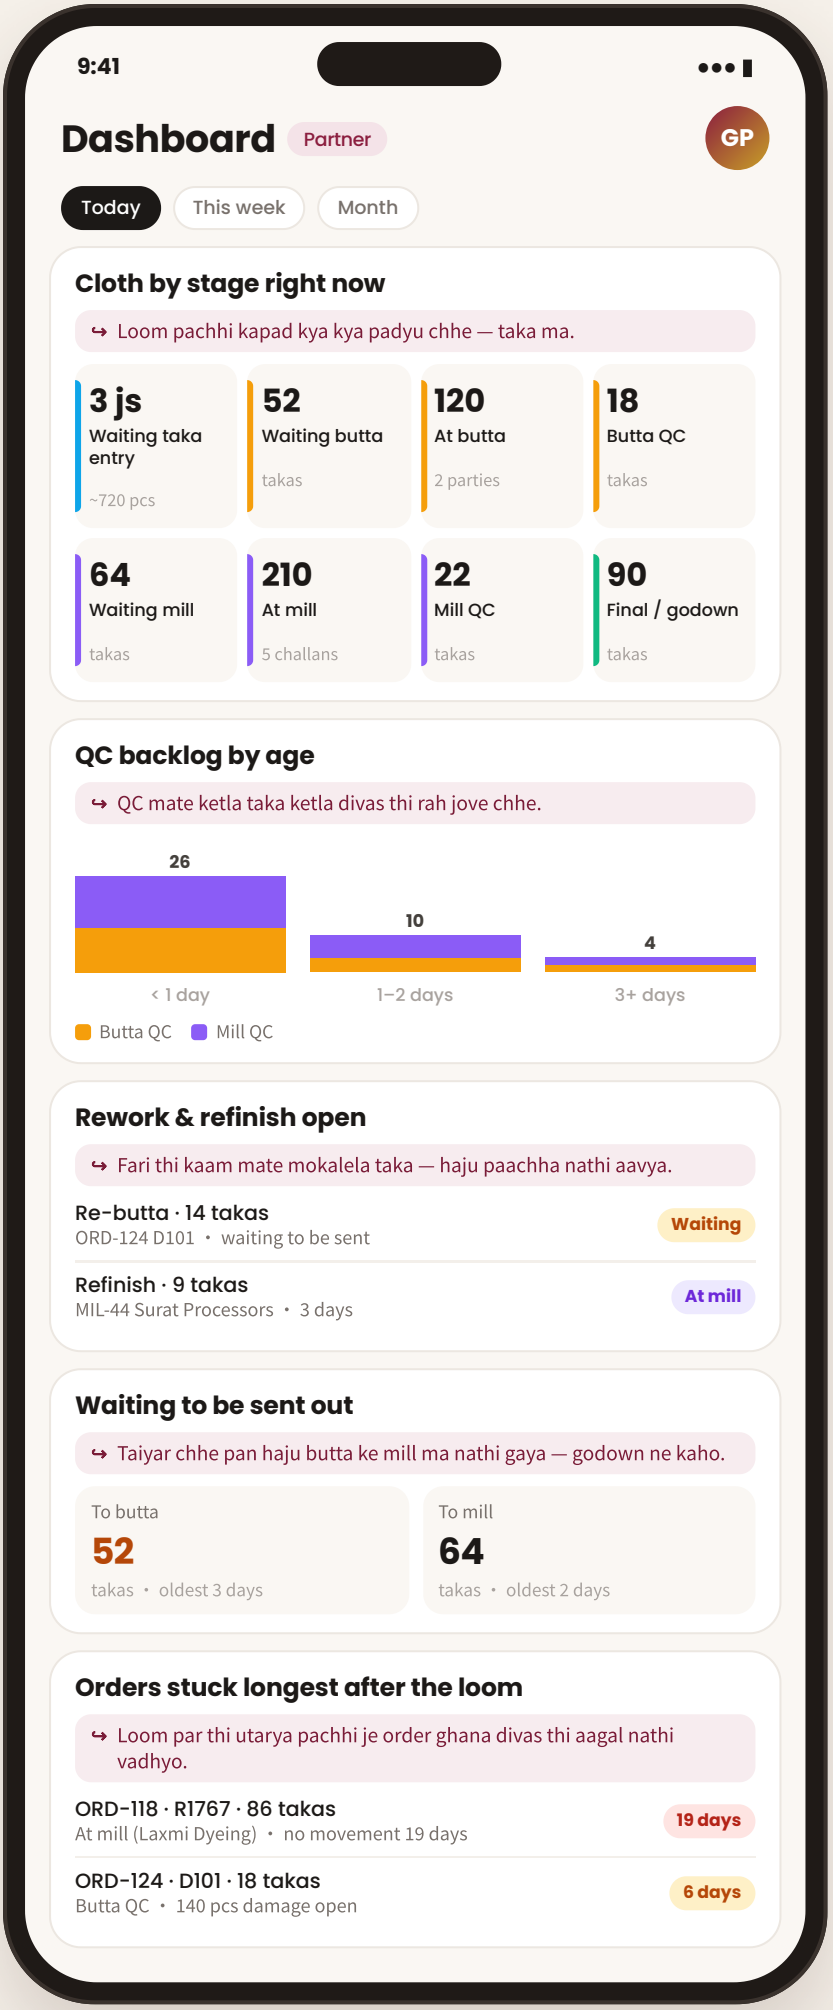

Idle hours lost this week
READY Gaps between one jobsheet completing and the next starting on the same loom.

On every card

Tap a number, row or bar to open the list behind it (orders, takas, challans), already filtered. The chips at the top change the period for all cards. Badges: red = act today, amber = watch, green = fine.

PARTNER · GAURANG (PRODUCTION)

Flow after the loom

What this screen answers

Where the cloth is after weaving and where it is piling up: taka entry, butta, QC, mill, rework.

CARDS & DATA USED

Cloth by stage right now
READY Taka stage counts; completed jobsheets without takas.

QC backlog by age
READY Takas in butta_qc / mill_qc by time since received.

Rework & refinish open
READY Takas in rework_butta / refinish stages.

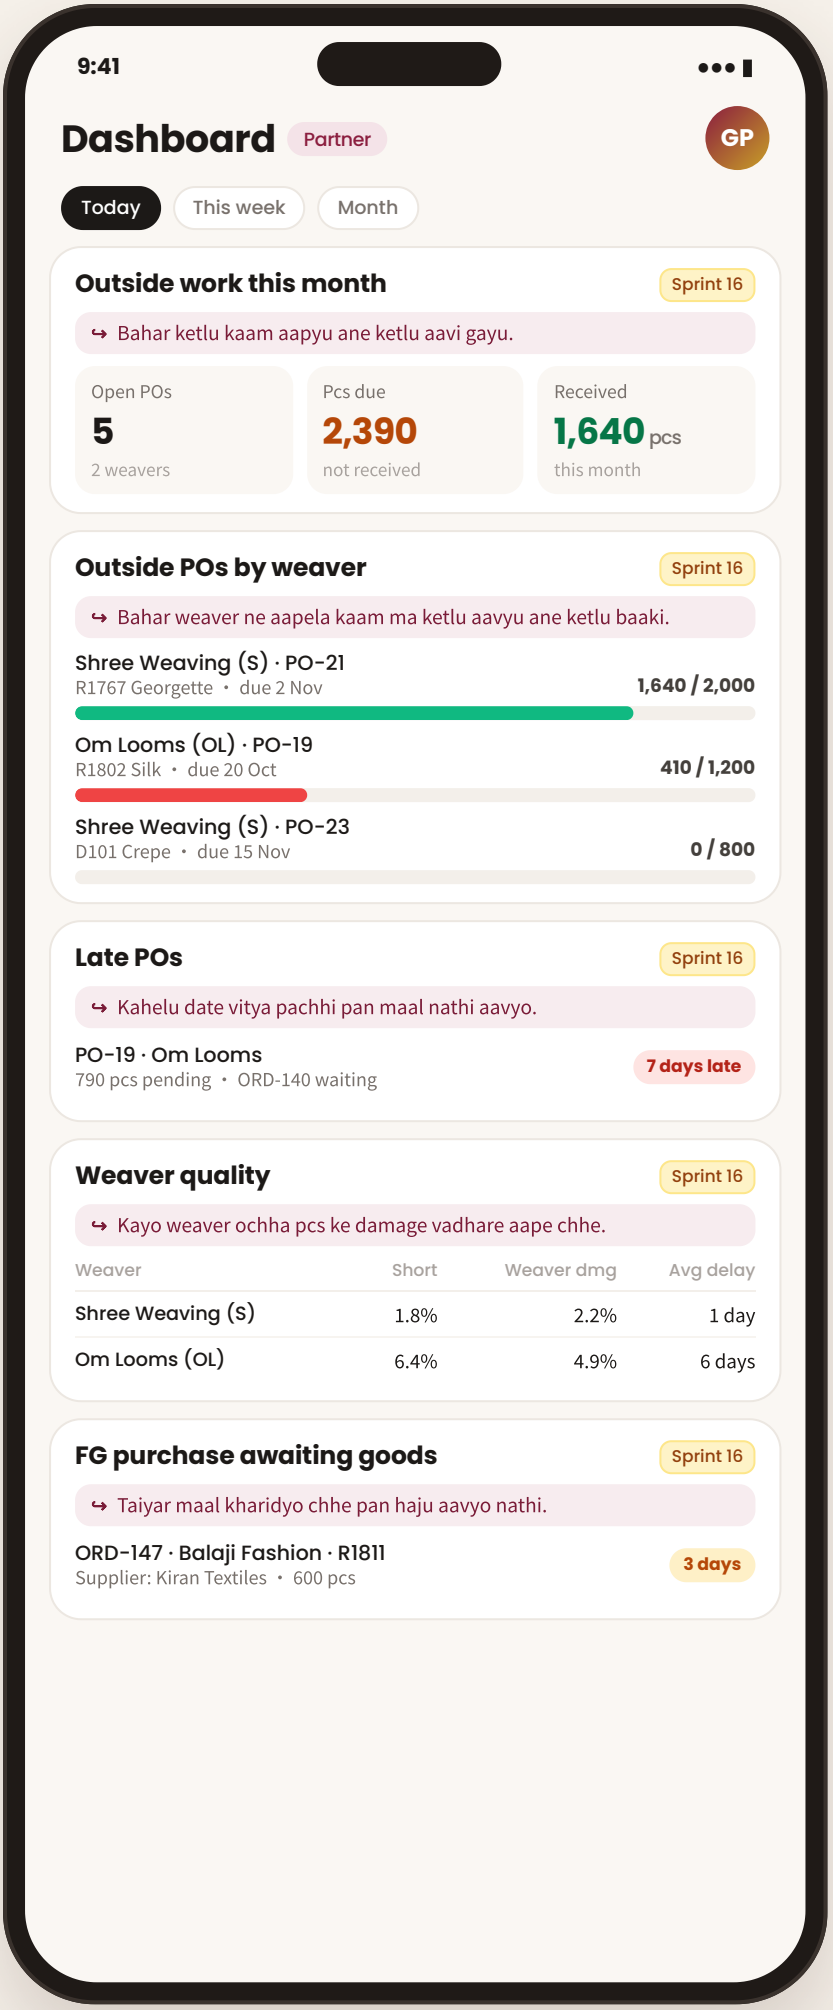

Waiting to be sent out
READY Takas in at_butta pending (not on a challan) / waiting_mill.

Orders stuck longest after the loom
READY Takas grouped by order, time since their last stage change (taka_events).

On every card

Tap a number, row or bar to open the list behind it (orders, takas, challans), already filtered. The chips at the top change the period for all cards. Badges: red = act today, amber = watch, green = fine.

Outside production & FG purchase

What this screen answers

Work given to outside weavers and finished goods bought: what is due, what is late, and how reliable each weaver is.

CARDS & DATA USED

Outside work this month
SPRINT 16 Outside POs and receipts.

Outside POs by weaver
SPRINT 16 Outside POs: ordered pcs vs received receipts.

Late POs
SPRINT 16 PO due date vs today, pcs not received.

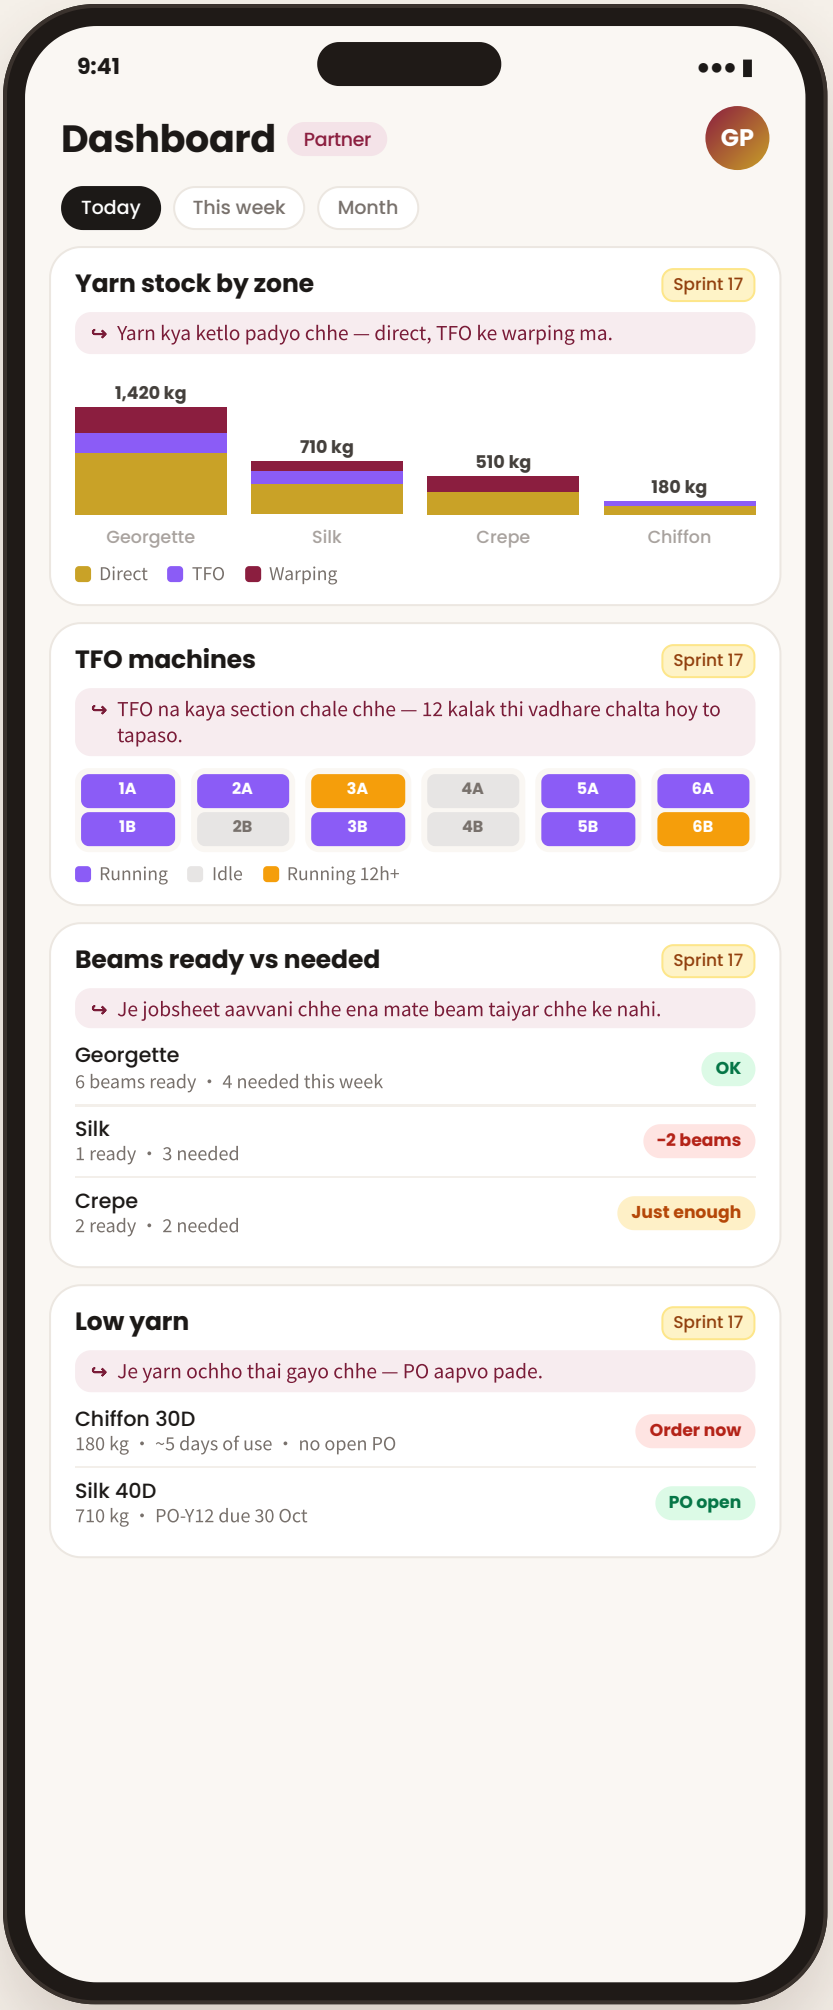

Weaver quality
SPRINT 16 Receipts vs PO pcs; weaver-type damage.

FG purchase awaiting goods
SPRINT 16 Orders in awaiting_goods.

On every card

Tap a number, row or bar to open the list behind it (orders, takas, challans), already filtered. The chips at the top change the period for all cards. Badges: red = act today, amber = watch, green = fine.

Yarn, TFO & beams

What this screen answers

Whether there is enough yarn and beams for the planned jobsheets, and what the TFO and warping are doing.

CARDS & DATA USED

Yarn stock by zone
SPRINT 17 yarn_stock_moves balance by zone and quality.

TFO machines
SPRINT 17 TFO programs running per machine section.

Beams ready vs needed
SPRINT 17 Beams in stock by quality vs pending jobsheets by quality.

Low yarn
SPRINT 17 Stock ÷ average daily consumption; open yarn POs.

On every card

Tap a number, row or bar to open the list behind it (orders, takas, challans), already filtered. The chips at the top change the period for all cards. Badges: red = act today, amber = watch, green = fine.
