PRODUCTION SUPERVISOR

Floor today

What this screen answers

What the supervisor must do right now on the floor: what to start, which looms are empty, what finishes soon.

CARDS & DATA USED

Today on the floor
READY Ongoing jobsheets, frames entered today, jobsheets status sent.

Start these first
READY Sent jobsheets ordered by sent time / order age (no client name).

Empty looms
READY Machines without an ongoing jobsheet + time since last completion; jobsheets assigned to that loom.

Finishing soon
READY Ongoing jobsheets close to planned frames (estimate from average speed).

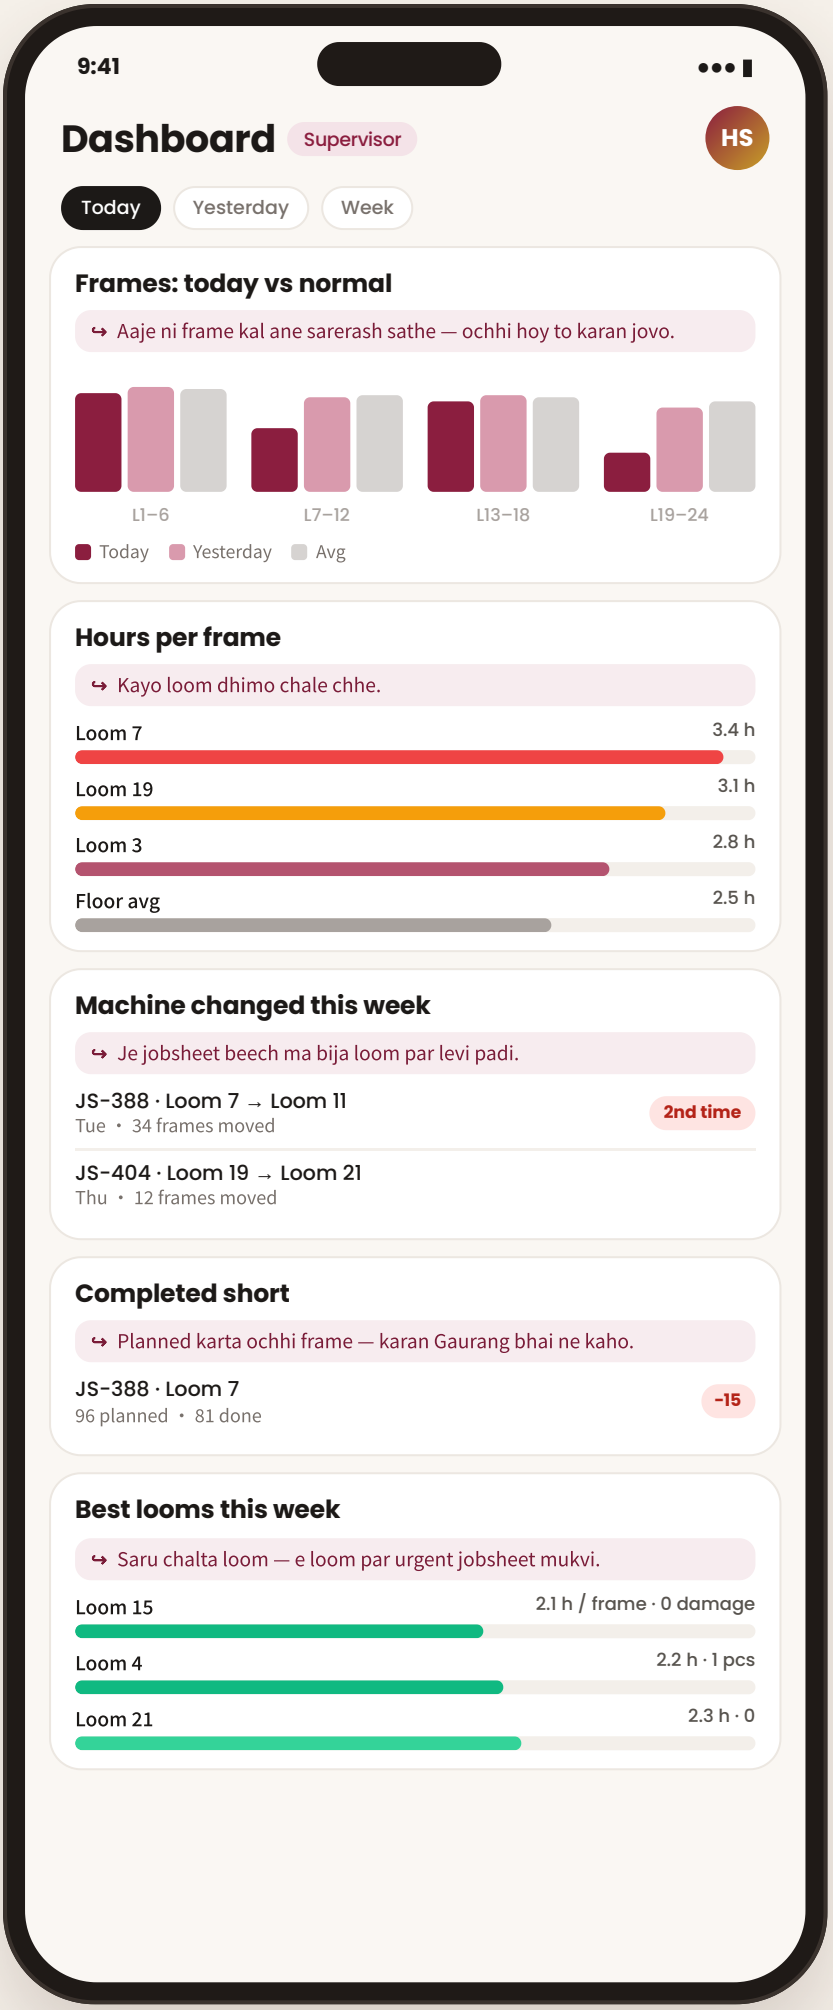

Damage from my looms today
READY Machine-type damages recorded today on takas of ongoing / just-completed jobsheets.

On every card

Tap a number, row or bar to open the list behind it (orders, takas, challans), already filtered. The chips at the top change the period for all cards. Badges: red = act today, amber = watch, green = fine.

PRODUCTION SUPERVISOR

Loom performance

What this screen answers

How each loom is doing compared with yesterday and the normal speed, and which ones need a mechanic.

CARDS & DATA USED

Frames: today vs normal
READY Frames done per loom group by day.

Hours per frame
READY Running hours ÷ frames per loom (7 days).

Machine changed this week
READY Change-machine events.

Completed short
READY Completed jobsheets with frames done < planned.

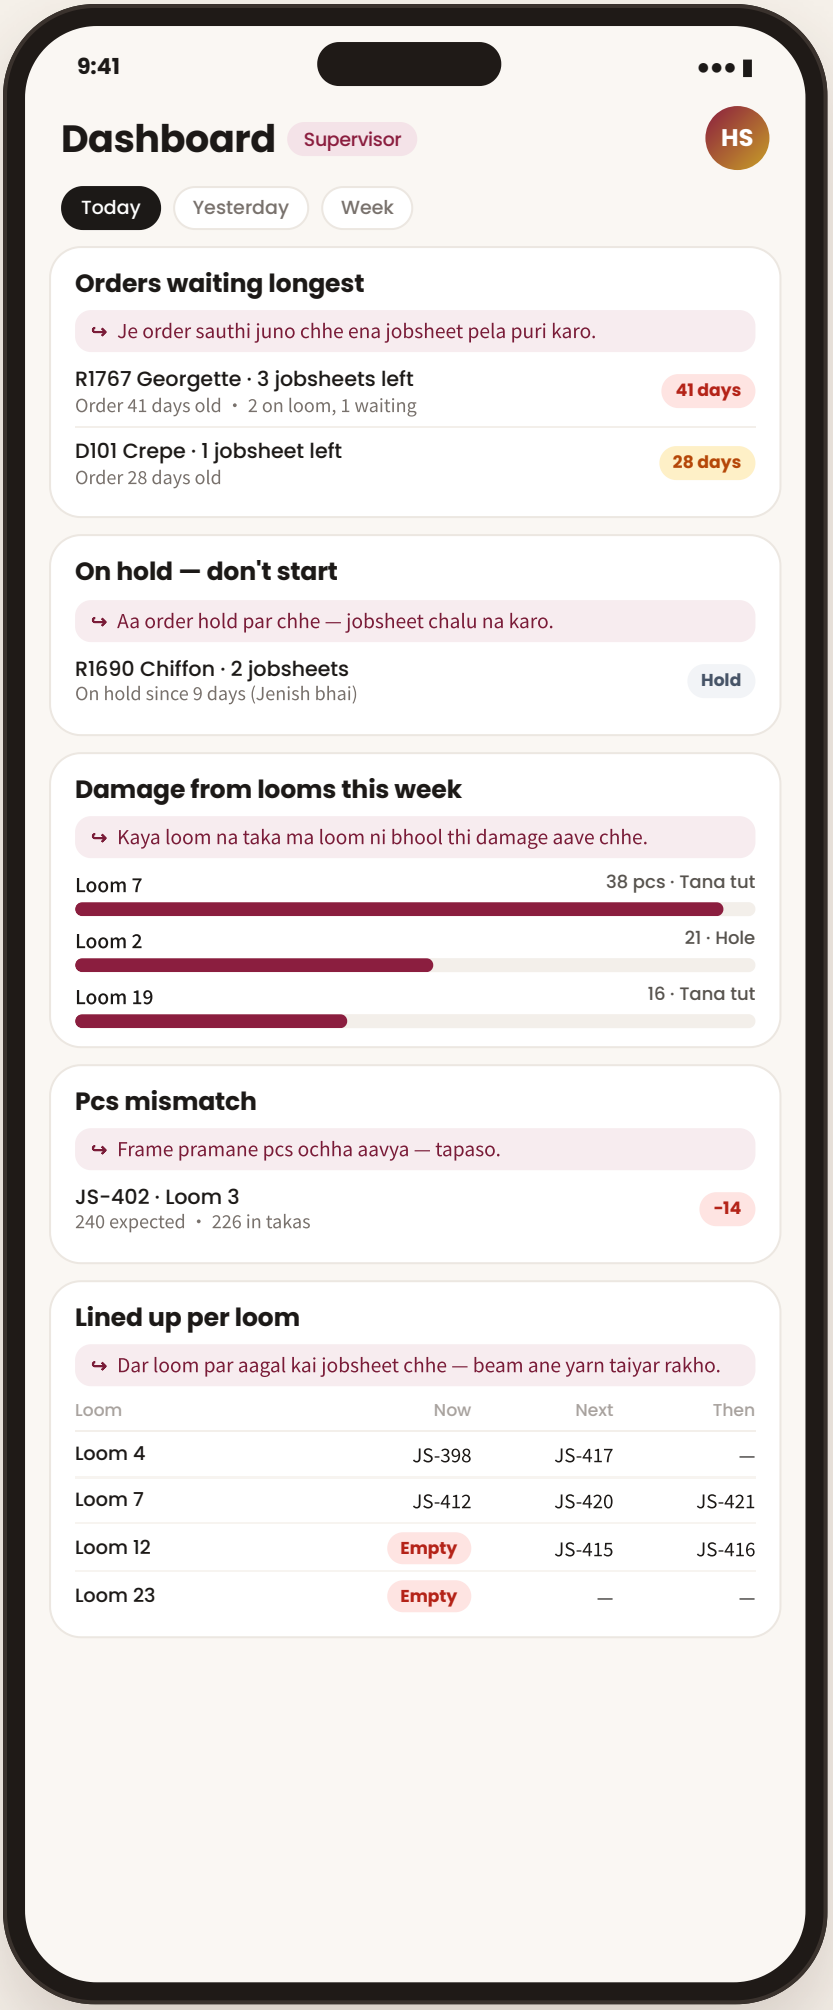

Best looms this week
READY Hours per frame + machine damage, 7 days.

On every card

Tap a number, row or bar to open the list behind it (orders, takas, challans), already filtered. The chips at the top change the period for all cards. Badges: red = act today, amber = watch, green = fine.

PRODUCTION SUPERVISOR

Priority & quality

What this screen answers

Which orders are urgent, what not to start because of hold, and where the floor is causing damage.

CARDS & DATA USED

Orders waiting longest
READY Open orders (no client name) with jobsheets not completed, by order age.

On hold — don't start
READY Orders with is_on_hold; their pending jobsheets.

Damage from looms this week
READY Machine-type damage from takas of each loom's jobsheets.

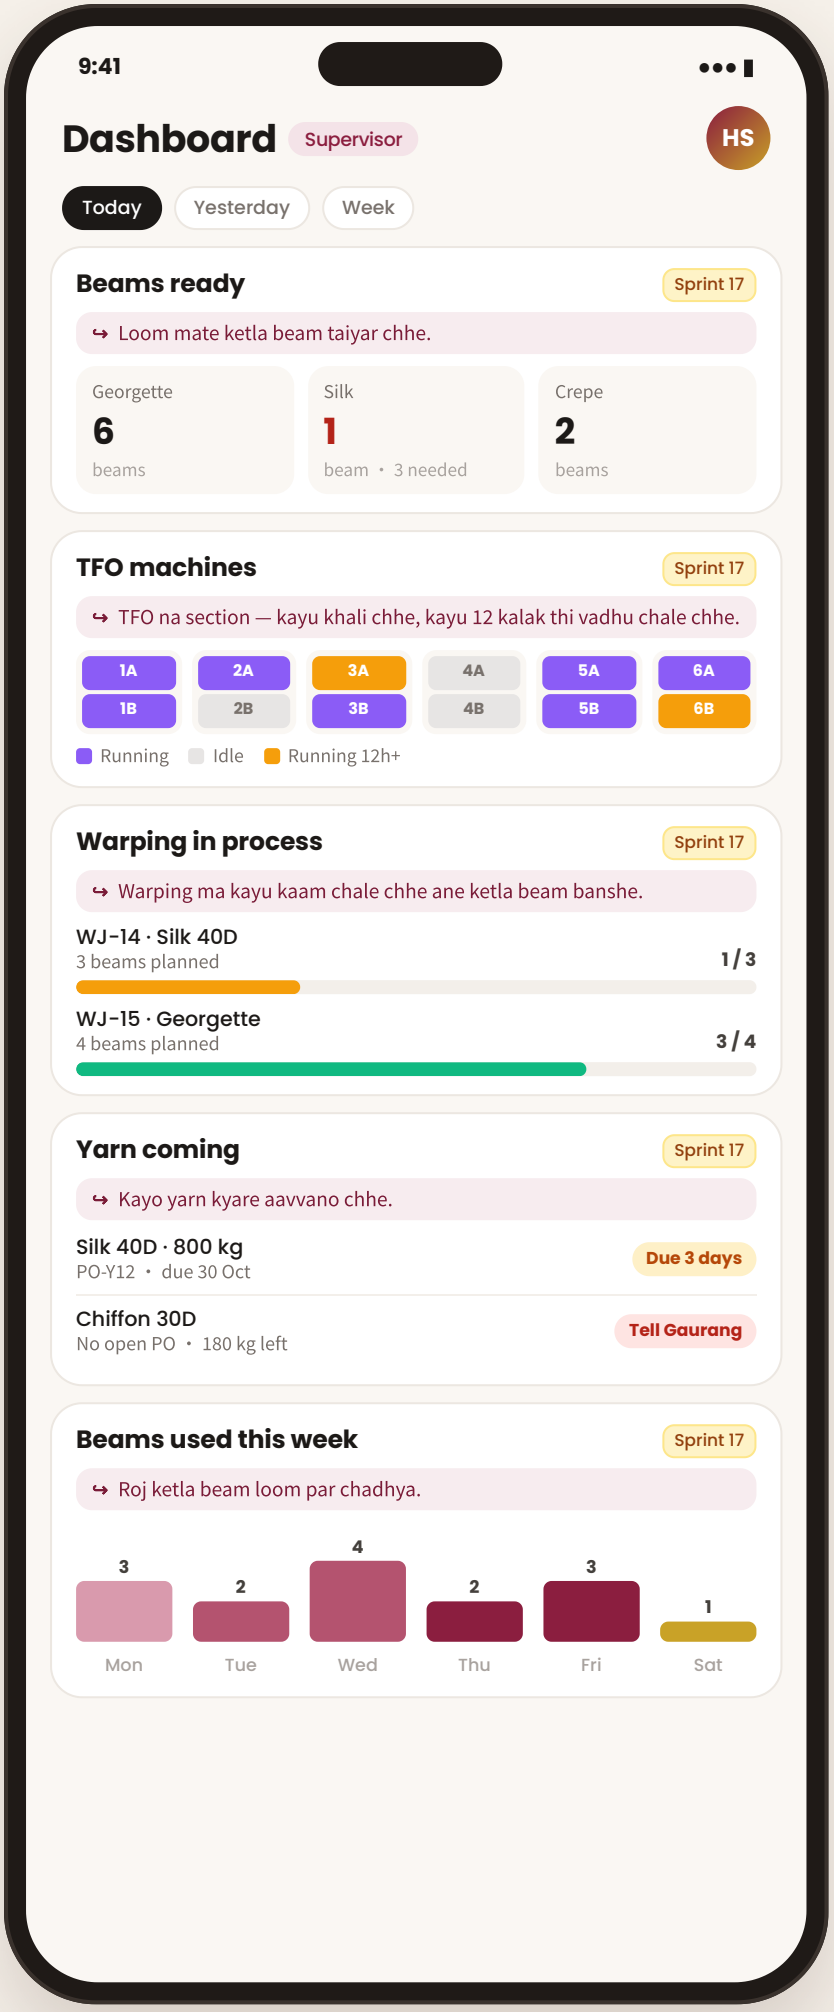

Pcs mismatch
READY Frames × sections vs taka pcs.

Lined up per loom
READY Sent jobsheets assigned to each machine, in order.

On every card

Tap a number, row or bar to open the list behind it (orders, takas, challans), already filtered. The chips at the top change the period for all cards. Badges: red = act today, amber = watch, green = fine.

Yarn & beams

What this screen answers

Whether there are beams and yarn for the next jobsheets, and what the TFO and warping are doing.

CARDS & DATA USED

Beams ready
SPRINT 17 Beams in stock by quality.

TFO machines
SPRINT 17 TFO programs.

Warping in process
SPRINT 17 Warping jobs → beams made.

Yarn coming
SPRINT 17 Open yarn POs; low stock.

Beams used this week
SPRINT 17 Beams issued to looms per day.

On every card

Tap a number, row or bar to open the list behind it (orders, takas, challans), already filtered. The chips at the top change the period for all cards. Badges: red = act today, amber = watch, green = fine.
